Must read this before installation
Important instructions about your CISS system R260 R280 R380

1. If your printer is brand new you must first install the original cartridges that came with your printer. The reason for this is because the printer needs to initialize with the original cartridges. CISS cannot initialize a new printer and the printer will show an error-saying cartridge cannot be recognized.

2. After you remove original cartridges you can install CISS.

3. Please don't wait until your original cartridges are empty before installing CISS. In case CISS has a problem you still have your original cartridges to fall back on.

4. After installing CISS if there is something wrong or there is a printer error coming up- Please e-mail Devin at **cbiss@superpremiumelectronics.com**

5. Make sure to describe your printer error in detail and what you have tried so far to fix it. I will help you fix it or send replacement parts or a replacement unit.

6. If your ciss is equipped with auto reset chips ink levels only reset when ink is down to last 5%-10%. Auto reset chips will not reset if ink is at 80% or 50% and so on. If the ink levels is down to the last 5% and auto reset chips have not reset, then unplug your printer from power and wait 5-10 minutes, then plug it back in- ink should read 100% again.
If printer gives you an error on the screen that cartridges are not installed remove cartridges from print head and reinstall them back. That should fix the problem. R280 you may have to remove and reinstall cartridges to reset ink levels.

Thank you,

Warning!
Please keep ink tanks on the same level as the printer.
DO NOT put ink tanks above the printer or on top of the printer.
Air Filters must be installed on to ink reservoirs outside the printer. Do not put air filters inside the printer
Do not mix ink from different manufactures mixing ink may cause ink to clog in the ciss or even worse in your printer.

CIS for Epson r260 r280 r380 Install Instructions

Thank you for purchasing Continuous Ink Supply System. We appreciate your support and will try our best to make your experience with our products a pleasant one. Printing has been a different experience ever since you installed Continuous Ink Supply system on your own printer. Just imagining being able to print without regard to the ink level in those expensive little cartridges.

Please take your time installing Continuous Ink Supply system. Do not remove your old cartridge until you have the CIS system primed and ready to install (to prevent the drying of heads). In addition, make sure you are getting perfect nozzle checks before installing the ST CIS system. The CISS system won't be able to work properly if the nozzles are previously clogged.

Most people get a perfect nozzle check the first time after installing the Continuous Ink Supply system; others may need to run two or three cleaning cycles or let the printer sit for a while before they get the perfect results.

1. General Guide:
1) Components
2. CIS system 1 set
3. Air filters 6 pcs
4. Refill syringe 1 pc
5 Opening box inspection
6 Check to see if any tubes have been separated from the CISS

2. Printer testing:
1) Check whether the printer is in normal condition, like mechanical status, lubrication status etc.
2) Print testing lines to ensure the printing head is good condition.
3) Print pictures to see whether the printing image is ok.

Version A CISS

Version B CISS

Installation Procedure

Step 1: Preparation

Put the CISS on the right side of the printer. and place all the tubes at correct position.

Pull out the small rubber plug from the air hole as picture shown above.
For all 6 colors

Place 6pcs of air filters into air holes,
For all 6 colors.
With the fat side down
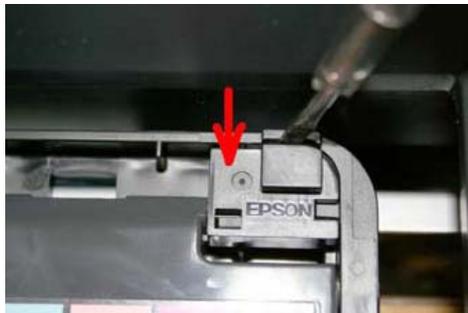

Step 2: Take out the original cartridges

Push the button for changing cartridges

Move the cartridge to the place of changing position

Move the clip away, then the cartridge can be taken off

Insert the screwdriver into the slit, push it down slowly.

Remove the clip

|		
Remove the Lid	Remove Cartridges	Move cartridge all the way over to the left
Place cartridge as shown above.	Move cartridge carriage to original position.	Insert the CISS cartridge the same As shown above in the picture
Press cartridges to make sure it is well installed.	As shown in red rectangle , when all the cartridges are well Installed, there will be a little sound	Install support arm as shown above.
Stick the clip on the right side of the printer, make sure the tube and the printer are in between the parallel line.	Here is r280 with version B CISS	Arrow shows lid sensor of r280. If it gives you any problems you can put a q-tip in it, wad of paper or you can tape lid down.

|		
Adjust the tube length and move the carriage. Make sure the tube length is enough so, the carriage can move to the left side	Move the cartridge car back and forth making sure the tubes will not get caught up on anything.	Adjustments are now finished
Tubes too long	Tubes twisted	PERFECT!!

Check the nozzle

Enter Checking Nozzle Panel

Nozzle is OK

Print test lines. If it is OK, then you can begin using.

Broken Lines

If there is broken lines, then pls clean the printer head.

If you have broken lines on the nozzle check run a head cleaning. Then let your printer sit 2-3 hours then run another nozzle check. If you still see broken lines then do another head cleaning and let it sit 3-4 hours, then print a nozzle check. Sometimes it takes 3-4 head cleanings. Do not run more than 3 head cleanings in a row. Let your printer sit awhile after each head cleaning. Letting the printer sit will help to clear up any printing problems.
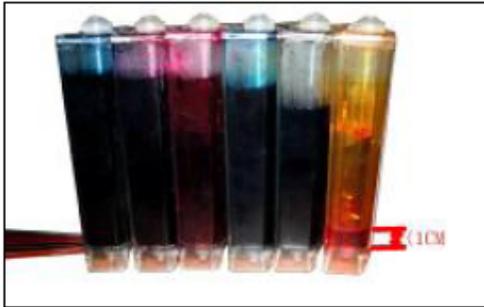

Chip Reset

If there is panel reminding you   chip is reset.

to change the cartridge, then please   **New model like r280** you may have to remove and reinstall

turn off the printer and re-start   cartridges to reset ink levels.

it after 2 minutes.

5 Refill Ink

Please pay attention to the ink level in the reservoirs; if the ink level is below 1CM as the picture shown above, please use refill kits to fill ink into Reservoir bottles. Carefully pull out the rubber plugs from the ink refill holes (There is a possibility of ink spattering. Please be careful.) Refill ink according to the colors. Then re-cap the rubber**.** (Please keep the printer and the reservoir bottles at the same level while refilling ink.)

Attention for Maintenance:

Take out the CISS including the inner cartridges and other components. Then remove support arm from the printer, and re-install original cartridges. Please inquire local dealer before sending to maintenance.

Notice:

1. Please don't take out the cartridges at random after installing the CIS system. Keep the reservoir bottles at the same level as the printer.
2. Try to keep at least 1/2 inch of ink in the reservoir.
3. **Please keep ink tanks on the same level as the printer. DO NOT put ink tanks above the printer or on top of the printer.**
4. Suggested using in a dry place between 15C and 35C degree. Avoid exposure to direct sunlight.
5. Don't reverse or lean the continuous ink supply systems during shipping. Please make sure all the ink filling holes and ventilation holes are closed tightly during transportation. Otherwise, the ink may leak.
6. Don't sway the cartridge frequently. It may cause ink leakage.
7. Don't pull out the connector of cartridge and don't tear off adhesive tape at the bottom of cartridge.

Warning:

1. Not drinkable; keep it out reach of children.
2. Avoid exposure to direct sunshine and don't keep it in high or freezing temperature.
